

NEW TYPE OF PACKAGING MATERIAL

for singlebox bearing packaging

PREVIOUS PACKAGING:

Up to diameter 90mm

- Design and paper quality remain the same while box dimensions are slightly changed

NEW PACKAGING:

From diameter 90mm – 160mm

- Design change
- Change in paper thickness
harder, makes them resistant to manipulation and storing
- Change in closing method (more compact closing)

From diameter 160mm – 270mm

- Design change
- Change in paper thickness
harder, makes them resistant to manipulation and storing
- Change in closing method – box with lid
easier packaging and easier manipulation for customers

New packaging types depend on the usage of stocks of boxes in old design. Due to this you may receive a one type of bearing in the new packaging but another type due to stocks may be packed in the original packing design
