

PROFESSIONAL APPROACH TO WORLD INDUSTRY

SKIN PACKING

of small single row deep groove ball bearings

- This way of packing is determined especially for the packing of miniature and small ball bearings on the base board
- with endless print of the trade mark of the supplier ZVL SLOVAKIA.
- Skin wrapping machine works by dragging the foil through backing paper and then shaping foil around bearings
- Skin package is marked by identification label and packed into carton marked ZVL
- Full carton is marked by a identification label and sealed by ZVL tape
- Based on the specific requirements of customers we offer this way of packing also for other types of bearings.

Packing:

Ø D	Number of Pieces In One Package	Type
10	187	623
13	117	624
16	45	625,634
19	35	626, 635, 607
22	24	627, 608
24	24	609
26	24	629
28	24	6000
30	20	6200

Advantages of the Packing

- Better anticorrosive protection than packing in tubes
- Clear identification of the brand ZVL
- Practical manipulation with the bearings
