

INLINE BEARINGS

ZVL Trade Code:

608 INLINE

Technical Specification Code:

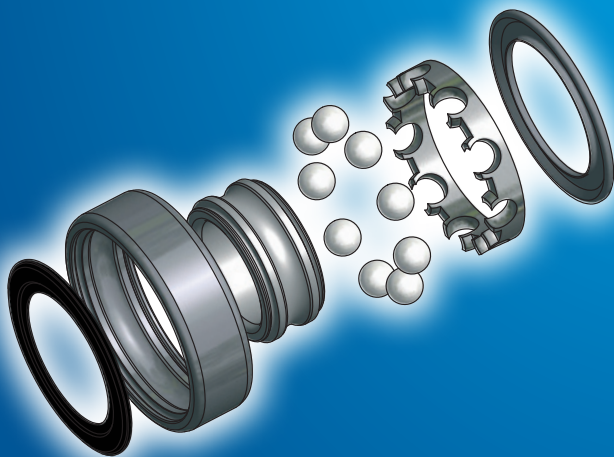

608 RSZ TNGH P5 OIL

Index of Abbreviations:

- RSZ** Open cage side with steel shield, the opposite side with non-contact seal
- TNG** Fiberglass reinforced polyamide cage
- H** Single-piece open cage
- P5** Tolerance class (equivalent to ABEC 7)
- OIL** Oil lubricated

There is a possibility of servicing these bearings by washing in standard washing devices using washing medium e.g. petroleum. It would be necessary to carefully remove the shield with a sharp object prior to washing. Health & Safety regulations must be kept during washing process. It is advisable to relubricate bearings on regular basis. Depending on intensity of use 2 drops of lubricating oil are to be applied on each occasion.

Each packaging contains 16pcs of bearings.
